# Welcome to Our Style Guide Template

## When Creating Your Editorial Style Guide

1. Make it your own, but you're welcome to [use ours as an example](#).
2. Think of style as *principles that will lead the way* instead of step-by-step instructions.
3. Stick to the basics. Focus on what's most important for someone new to your style to know.
4. For in-depth guidelines, link to external sources, such as wikis, FAQs on a website, or other guides.

## Benefits of Using This Google Slides Format

1. You can make your style guidelines more digestible.
2. You can use editable, navigational elements like the sidebar.
3. You can also use a vertical format of our template, which can fit up to 25 pages in the sidebar navigation.
4. You can select "Publish to the web" in the File menu to publish a live slide presentation that you can update at any time from your master Slides doc, which is more convenient than using PDFs (which you can still download). You can share the link and users can refresh the presentation to see the latest version at any time.

# Our Core Values

In addition to your brand's mission, vision, and philosophy, take the opportunity to share your brand's core values. These values can be principles or directives that apply more than to just content but to all of your operations. Use the "rule of three" as a good place to start. Share three core values with actionable suggestions on how people can support each.

## Value #1

# Voice and Tone

Your brand's voice and tone should support your core values. Although voice and tone are often used as synonyms, don't get caught up on the nuanced differences. Your voice is the content of what you say, while your tone is the way in which you say it. Think of several adjectives or phrases to describe your brand's personality and how they relate to your audience.

# Style and Usage

We recommend deferring to the [Associated Press Stylebook](#) for general style and usage. Instead of rehashing the entirety of AP Style in your guide, focus on areas where your brand's style differs or where you most commonly see mistakes while producing content. You can link off to more in-depth lists, but focus on the most important ones here.

Share guidelines for using links and on the specifics of formatting them. Start with the most important rules here. If you have lots of specifics (or those for various platforms), provide specific examples in another doc or wiki.

Although you should have a separate Brand Style Guide that goes in-depth, highlighting the basic usage guidelines for your brand name and legal company name is a good place to start. You can also list variations or contextual uses of your brand name that are either approved or not. In the ClearVoice Editorial Style Guide, we addressed the most common issues we encounter. Consider someone writing a press release or article about your brand. How would you prefer they mention your brand?

# Boilerplate

Your brand's boilerplate, or company summary, should be a part of your Brand Style Guide. Including your full boilerplate (which can be used in press releases) and/or a shortened version for other content channels can help writers and external parties speak about your brand more consistently.
